Built for the realities of industrial production

COLORJET Bangladesh helps printing businesses choose the right technology, set up production and keep machines performing with dependable local support.

We serve signage, textile, garment, branding, advertising and commercial print operations. Every recommendation begins with the application, expected capacity, operating conditions and long-term maintainability — not only a machine model.

Supplied corporate wall visualization — concept artwork, not an installation photograph.

VISION

To become Bangladesh's most trusted industrial digital printing solution provider through advanced technology, reliable products and long-term support.

MISSION

To provide clear technical guidance, professional installation, operator training, spare parts and dependable after-sales service.

VALUES

Quality in recommendation. Commitment in execution. Service that keeps customer production moving.

One accountable partner from selection to support

The result: a coordinated solution designed around output quality, uptime, operator readiness and future expansion.

A portfolio organized around production workflows

Signage & graphics

Eco solvent systems for flex, vinyl, sticker, wallpaper, indoor branding and wide-format commercial output.

Textile & sublimation

Industrial sublimation printers and heat-transfer systems for sportswear, garment and home-textile production.

Garment & DTF

DTF printers, powder application, curing and transfer systems for apparel decoration and branding workflows.

Ink, media & spares

Compatibility-controlled inks, transfer media, printheads, maintenance parts and production accessories.

Also available: UV flatbed, cutting plotter, lamination and finishing systems.

Textile production scales from starter to factory-grade

Industrial platforms

F1-2216 • 16 × Epson i3200-A1 • 1.9 m / 2.6 m • 300-500 sqm/h
F1-2208 • 8 × Epson i3200-A1 • 1.9 m • 180-250 sqm/h

Designed for export-level garment, sportswear and continuous textile production environments.

A scalable range

Select by volume, head count and growth plan.

4-head PY-1904 80-120 sqm/h

2-head PY-1902 40-60 sqm/h

1-head PY-1901-SUB 20-35 sqm/h

Kyocera KJ4A-2208 Factory-grade continuous production

Final width, head configuration, speed mode and workflow are confirmed before order.

Graphics production needs more than the printer

ECO SOLVENT

1.9 m to 3.2 m systems

XP600 and Epson i3200 configurations for signage, wallpaper, flex, vinyl and branding output.

UV FLATBED

4050 and 6090 platforms

Rigid-media printing for acrylic, metal, gifts, plates and specialty signage applications.

FINISHING

Cutting and lamination

MG-1200 / 1350G plotters plus 1680A automatic and TS-1600 manual laminating systems.

Print, powder, cure and press — one coordinated workflow

DTF production

- ✓ PRINTDOT DTF-700 in 4-head and 2-head configurations
- ✓ Powder shaker and curing system
- ✓ Film, ink and transfer-consumable compatibility support
- ✓ Workflow advice for apparel decoration and branding

Heat-transfer capacity

Industrial roller options align transfer speed with textile output.

420 mm × 1.8 m

0-380 m/h

600 mm × 1.8 m

0-500 m/h

800 mm × 1.8 m

0-930 m/h

Configuration and real production speed depend on media, print mode and operating conditions.

Consistency depends on the complete operating system

Machine performance is protected by correct compatibility, disciplined maintenance and timely replacement of critical components.

- ✓ Eco solvent, sublimation, textile and DTF ink systems
- ✓ Transfer paper, DTF film and production media
- ✓ Printheads, dampers, caps, pumps and filters
- ✓ Boards, motors, sensors, mechanical components and maintenance guidance

Compatibility first

Model, printhead, ink chemistry, firmware and production media must be confirmed before supply. This protects output quality, component life and warranty decisions.

COLORJET coordinates machine, consumable and service requirements through one accountable support relationship.

Installation is the start of a long-term service relationship

A practical service model

- ✓ Pre-installation site and workflow review
- ✓ Delivery, setup, commissioning and production-readiness checks
- ✓ Operator training for operation, quality and routine care
- ✓ Technical support focused on reducing downtime
- ✓ Spare-parts and warranty coordination
- ✓ Ongoing support for maintenance and future expansion

01

Consult

02

Install

03

Train

04

Operate

05

Maintain

06

Grow

Nationwide experience across different production environments helps COLORJET provide practical, application-aware support.

Accountability begins with leadership

COLORJET Bangladesh was founded to make industrial printing technology more accessible, more practical and better supported for businesses in Bangladesh.

Our leadership approach stays accountable from the first consultation through installation, training, service and future growth.

Md Aktaruzzaman

Founder & Managing Director
COLORJET Bangladesh

“

Every machine sale should be the beginning of a long-term technical relationship — not the end of a transaction.

Leadership principle

Vision • Leadership • Innovation

Business automation strengthens service delivery

COLORJET Business Manager ERP

A role-based operations platform supporting internal coordination and management visibility.

- ✓ Owner and management dashboards
- ✓ Customer, product, invoice and universal search
- ✓ Engineer scheduling and service operations
- ✓ Branch, warehouse and stock visibility
- ✓ Approvals, audit trails and printable reports

Why it matters

Better information flow helps teams coordinate customers, inventory, accounts and technical service with greater accountability.

Customers gain more than a machine supplier

The value comes from connecting product, people and service into one accountable relationship.

01 —

Complete solution

Machines, inks, media, spare parts, installation and technical support from one source.

02 —

Application guidance

Recommendations based on production goals, width, capacity, workflow and operating conditions.

03 —

Technical experience

Hands-on understanding of industrial printing environments across Bangladesh.

04 —

After-sales strength

Support focused on uptime, operator readiness, maintenance and production continuity.

05 —

Compatibility control

Consumable and spare-part selection aligned to machine, printhead and workflow requirements.

06 —

Long-term partnership

Every installation is treated as the beginning of an ongoing technical relationship.

Quality in recommendation • Commitment in execution • Service after delivery

LET'S BUILD YOUR NEXT PRODUCTION SETUP

Ready to discuss the right printing solution?

Talk to COLORJET Bangladesh for machine consultation, product supply, installation, training, spare parts and after-sales support.

Product specifications, configuration, delivery terms and commercial prices are confirmed in the final quotation or agreement.
